Experience

User Experience Consultant — Freelance

January 2025 – Present | Toronto, Ontario (Remote)

- Assist organizations in modernizing their digital systems.
- Interview internal stakeholders to diagnose key problems and define project objectives while balancing constraints.
- Utilize design research methods to understand how clients and their users interact with their services.
- Tailor interfaces and end-to-end user flows to organizational needs with consideration for business requirements, existing design systems, and accessibility standards.
- Support testing and implementation of design solutions.

UX/UI Designer — ManeFrame

August 2024 – October 2025 | Toronto, Ontario (Remote)

- Transformed the app's user experience to align with leadership's vision of a learning platform for beauty professionals.
- Devised a user research proposal to identify users' needs and better define the app's value proposition.
- Drafted research materials including consent forms, screening criteria, recruitment scripts, and discussion guides.
- Conducted interviews with subject-matter experts to understand current industry trends and professional roles.
- Researched social media usage and behaviour patterns through content analysis and online ethnography.
- Developed personas and journey maps to synthesise findings and inform design decisions.
- Communicated research insights and recommendations to business, product, and executive stakeholders through presentations and shareouts.
- Designed new features, wireframes, and user flows within a fast-paced development timeline, ensuring all interactions and interfaces followed best practices for mobile accessibility.
- Streamlined design hand-off by collaborating with developers to refine documentation and co-create a design system.
- Formulated user testing protocols to validate design implementation.

Education

Bachelor of Industrial Design

Carleton University

2018–2023 | Ottawa, Ontario

With High Distinction, GPA 11.8/12

Skills

Design Research

Research planning, user interviews, survey design, qualitative analysis, contextual inquiry, journey maps, personas, usability testing, workshop facilitation

UX/UI Design

Wireframes, user flows, prototyping, mockups, information architecture, design systems

Tools

Figma, Adobe Creative Suite, Affinity, Microsoft Office, SolidWorks, DaVinci Resolve

Communication

Technical documentation, report writing, presentations, storytelling, public speaking

Front-End Development

WCAG standards, HTML, CSS, JavaScript, React, Python

Product Development Intern — Canadian Tire Corporation

October 2021 – August 2022 | Toronto, Ontario

- Managed the development of multiple products for Canadian Tire's owned kitchen brands PADERNO and Vida by PADERNO.
 - Conducted extensive desk research on kitchen goods, looking at product reviews, cooking trends, and literature on ergonomics to uncover opportunities for improvement.
 - Analysed samples and defined product requirements through benchmark testing and comparative analysis.
 - Facilitated an internal discovery workshop to generate new product ideas.
 - Conveyed design recommendations and product specifications to cross-functional teams and manufacturers through presentations and technical documentation.
 - Supported a visual brand language redesign with trend analysis and mood boards.
 - Designed on-product graphics and interfaces in accordance with technical and regulatory requirements.
 - Helped lead an initiative to remove non-recyclable materials from product packaging.
-

Certifications

Design Research Mastery Outwitly Inc.

February 2024

Certifies knowledge of UX and design research methodologies, project management, and research planning.

TCPS2: CORE 2022

Panel of Research Ethics

September 2022

Certifies knowledge of ethically conducting research with human participants.

Projects

Dues Dashboard — LiUNA Local 1059

January 2025 – April 2025

- Helped administrators reduce member complaints by redesigning their members' payment history page.
- Mapped out the service blueprint of their arrears notice system with the help of internal stakeholders.
- Analysed members' experiences across different touchpoints to pinpoint areas for improvement.
- Redesigned the "dues dashboard" on their web portal to bridge the gap in understanding between members and administrators.
- Provided in-depth specifications for styling and layout for hand-off to their external development team.

Design Fiction Workshops — Personal Project

December 2023 – February 2024

- Facilitated design fiction workshops to spark discussions about the future of design and technology.
- Co-organized in-person and virtual meet-ups.

Counter-cartography of Ottawa Housing — Design Anthropology Course

February 2023 – April 2023

- Worked with a team of designers and anthropologists to investigate the financialization of housing in Ottawa.
- Conducted a desk research on the Canadian housing market, urban planning, and "ghost buildings".
- Carried out autoethnographic fieldwork to explore personal relationships to urban spaces.
- Planned and facilitated a design workshop to investigate participants' relationships with housing in Ottawa.
- Coded findings and transformed insights into a data visualization (counter-cartography) and interactive report for communication to a general audience.

Fold-up Therapy Space — Capstone Project

September 2022 – April 2023

- Designed an artifact to demonstrate how we might improve access to psychotherapy through the use of third-spaces.
- Conducted user interviews to learn about clients' and therapists' experiences with therapy.
- Extensively researched trends in co-working, psychotherapy practitioners, professional standards, and recommendations for more integrated and accessible mental healthcare.
- Performed a qualitative analysis of the findings to define barriers to access, key elements of the therapeutic environment, and opportunities for therapists to expand their methods of practice.
- Iterated concepts of physical artifacts based on a persona created from the research insights.
- Created physical and narrative prototypes to elicit participant feedback and validate design concepts.
- Presented the final artifact at Carleton's 50th Grad Show with a poster, prototype, product video, and report.

Early Transit App — UX/UI Design Course

September 2021 – December 2021

- Designed an app to reduce stress for daily commuters using Ottawa Transit.
- Conducted user research into commuters' experiences; planning, organizing, and conducting interviews with a representative selection of participants.
- Conducted a screening survey to find participants and collect quantitative data on transit of ridership.
- Created a set of personas and a journey map to represent insights of our research.
- Developed user flows that demonstrated the app's core functionality.
- Engaged participants in usability testing and card sorting to validate user flows and information architecture.
- Designed a cohesive visual brand language to unify the app's interface.

Hobbies & Interests

In my free time, I enjoy cooking, drawing, sewing, and making crosswords! I also like to unwind by watching a movie or playing one my favourite point-and-click adventure games.
