Experience

Dues Dashboard Redesign – LiUNA

January 2025 – April 2025

Worked with developer on a targeted redesign of the organization's payment history page to reduce member complaints. Created wireframes and specifications for hand-off to external dev team.

UX/UI Designer – ManeFrame

August 2024 – October 2025

Led the redesign of core app features, balancing research insights, business goals, and team feedback. Advocated for a user-centered design process and presented concepts to guide decision-making. Continuously collaborated with developers to improve hand-off and implementation within an agile environment.

Product Development Intern – Canadian Tire Corporation

October 2021 – August 2022

Led multiple kitchenware design projects and collaborated with cross-functional teams to ensure products met business targets. Conducted benchmark testing, produced technical documents, and corresponded with manufacturers to move designs to production.

Design Fiction Workshops – Personal Project

December 2023 – February 2024

Collaborated with two co-organizers to coordinate design fiction workshops within a local network in Ottawa. Facilitated brainstorming and discussions on design, technology, and current trends.

Foldable Therapy Space – Thesis/Capstone Project

September 2022 – April 2023

Conducted in-depth user research with clients and therapists to identify opportunities to make mental healthcare more accessible in Ontario. Utilized prototypes and stakeholder feedback to evaluate design concepts. Crafted compelling communication materials, including a poster, video, and report.
